Projects

Project 1 News App

Self Project based on HTML, CSS and JavaScript using rest API.

- A news application is a big interactive database that tells a news story. Think of it you would any other piece of journalism. It just uses software instead of words and pictures.

Project 2 Blogging Website

A web application using HTML, CSS, JavaScript, React JS and Firebase database.

- Share your knowledge. Many people blog to share their experiences without having to depend on journalists or media companies .
- Improve a website's online visibility and build an online community.

Project 3 FlavorFleet

A Food Delivery website using HTML, CSS, ReactJS, MongoDB, Express and Nodejs .

- A Food Delivery Website customers place orders directly through your website. They go over the menu and choose the items they want to order. After making their selection and paying for it, the consumer can either have their food delivered to a certain place or pick it up themselves.
- The major benefit of Food ordering gives customer the freedom and choice to place an order at virtually any time from anywhere.

Certification

- Full Stack Web Development Internship and training from Geeks For Geeks.
- Academic Merit Certificate
- Data Analytics with Python by NPTEL Online Certification
